Neha Gupta

Full Stack Software Engineer | React | TypeScript | Node.js | Angular | PostgreSQL | MongoDB

Mumbai, India | +91 83691 08352 | nehagpt12100@gmail.com

Portfolio: https://neha-portfolio-6jiw.vercel.app/ | GitHub: https://github.com/youcanalsocode

LinkedIn: https://linkedin.com/in/neha-n-gupta | Nationality: Indian | Notice Period: 30 days or less (currently serving)

Ready to relocate to the UAE (employment visa sponsorship required)

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 5+ years of experience designing, developing and optimizing secure, scalable web applications using React.js, Angular, TypeScript, Node.js, Express.js, REST APIs, PostgreSQL and MongoDB. Built financial KPI dashboards, an AI governance platform monitoring 300+ AI agents, and an enterprise HRMS, from requirement analysis through production. Experienced in JWT authentication, role-based access control (RBAC), API security, SQL performance tuning, code reviews, CI/CD and Git workflows. Strong foundation in data structures, algorithms and object-oriented design, with a record of mentoring junior developers and delivering customer-facing solutions.

TECHNICAL SKILLS

- **Frontend:** React.js, TypeScript, Angular (v15 to v21), AngularJS, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, PrimeNG, Responsive UI Development
- **Backend and APIs:** Node.js, Express.js, RESTful API Design and Development, API Integration, Third-Party Integrations, Python, FastAPI, Java, Spring Boot
- **Databases:** PostgreSQL, MongoDB (NoSQL), SQL, MySQL, Oracle, DB2, Query Optimization, Indexing, Stored Procedures, Database Views
- **Security and Authentication:** JWT Authentication, Role-Based Access Control (RBAC), Secure REST API Authorization, Input Sanitization, Password Hashing, CORS Configuration, Route Protection
- **Cloud and DevOps:** Git, GitHub, CI/CD, AWS, Azure DevOps, Databricks
- **Engineering Practices:** Code Review, Data Structures and Algorithms, Debugging and Troubleshooting, Mentoring, Object-Oriented Design, Performance Optimization, Technical Documentation
- **AI Tools:** ChatGPT, Claude, Cursor, Gemini, Google Antigravity

WORK EXPERIENCE

Full Stack Developer | Exponentia.Ai | Mumbai, India | 07/2024 - Present

- Built full stack features for an AI governance platform monitoring 300+ AI agents across multiple platforms, covering compliance tracking, risk assessment, budget monitoring and interactive dashboards to improve governance and data-driven decision making. Technologies: React, Angular, Node.js, MongoDB, SQL.
- Engineered 5 scalable full stack applications with modular backend REST endpoints, delivering real-time dashboards for AI agents, financial KPIs, sales and operational metrics. Integrated Databricks Genie for conversational analytics, automated data transformation for interactive visualizations, and implemented alerts to improve reporting efficiency and monitoring. Technologies: React, Node.js, JavaScript, HTML, CSS, Python, Databricks.
- Upgraded 12 enterprise Angular applications from version 15 to 19 and then to 21, resolving dependency and compatibility issues, optimizing performance and achieving zero-downtime deployments with improved maintainability. Technologies: Angular, TypeScript, Node.js.
- Designed and implemented security features across 15+ full stack applications, including JWT authentication, role-based access control (RBAC), secure REST API authorization, password hashing, input sanitization, CORS configuration and route protection, reducing security vulnerabilities and securing access to application resources. Technologies: Node.js, Express.js, JWT, Angular, React, MongoDB, REST APIs.
- Mentored junior developers, collaborated with UX/UI designers, and used AI-assisted development tools (Cursor, ChatGPT, Claude, Gemini) to accelerate responsive frontend development, code generation, debugging, refactoring, documentation and testing for rapid proof-of-concept delivery.

System Engineer | Tata Consultancy Services (TCS) | Mumbai, Maharashtra | 07/2021 - 04/2024

- Developed full stack features for an enterprise HRMS application with a cross-functional team, building employee leave management and HR operations modules with scalable frontend interfaces, backend services and business workflows. Technologies: React.js, Node.js, Express.js, REST APIs.
- Optimized the performance of 20+ enterprise full stack applications by resolving frontend and backend bottlenecks through lazy loading, code splitting, API response optimization, SQL query tuning, database indexing and performance profiling, resulting in a 23% increase in user engagement, a 50% reduction in bounce rate and lower production error rates. Technologies: Angular, React.js, Node.js, FastAPI, Java, Spring Boot, JavaScript, TypeScript, HTML5, CSS3, MongoDB, PostgreSQL.
- Developed and integrated RESTful APIs and third-party services, and conducted code reviews, enabling real-time data synchronization, dynamic dashboard updates and seamless system integration, which reduced manual refresh efforts by 90% and improved application responsiveness. Technologies: Angular, React.js, Node.js, Java, FastAPI, REST APIs, JavaScript, TypeScript.
- Optimized Oracle and DB2 databases by improving SQL queries, joins, indexing, stored procedures, database views and backend scripts, enhancing query performance, automating business workflows and improving data processing efficiency. Technologies: Oracle, DB2, SQL.

Technical Consultant Trainee (Internship) | Microsoft

- Built an AI-enabled Intelligent Bin in Python using Raspberry Pi to monitor real-time waste levels and trigger automated alerts at 80% capacity, reducing manual monitoring and improving waste management efficiency.

EDUCATION

Bachelor of Engineering in Computer Engineering | Padmabhushan Vasantdada Patil Pratishthan's College of Engineering | 01/2021

CERTIFICATIONS

- IoT and Game Development, Microsoft
