FULL-STACK SOFTWARE ENGINEER | ANGULAR | REACT | TYPESCRIPT | NODE.JS | JAVA | SPRING BOOT

Full Stack Developer with 5+ years of experience in requirement analysis, system architecture, application development, web development, designing, developing, and optimizing web applications, proficient in applying Data Structures and Algorithms (DSA) and object-oriented design principles to build customer-facing solutions.

WORK EXPERIENCE

Exponentia.Ai
07/2024 - Present

Full Stack Developer

- Developed Full Stack features for an AI governance platform to monitor 300+ AI agents across multiple platforms, implementing compliance tracking, risk assessment, budget monitoring, and interactive dashboards, improving governance and data-driven decision-making. Technologies: React ,Angularjs, Node.js, MongoDB,sql.
- Engineered 5 scalable Full Stack applications with modular backend endpoints to deliver real-time dashboards for AI agent, financial KPIs, sales, and operational metrics. Integrated Databricks Genie for conversational analytics, automated data transformation for interactive visualizations, and implemented alerts, improving reporting efficiency, and enabling monitoring. Technologies: HTML, CSS, JavaScript, Python, Databricks, Databricks Genie,node js,react
- Enhanced 12 enterprise applications by upgrading Angular projects from versions 15 to 19 and then 19-21, resolving dependency and compatibility issues, optimizing application performance, and achieving zero-downtime deployments with improved maintainability. Technologies: Angular-15, 19, 21, node.js
- Designed and implemented enterprise-grade security features across 15+ Full Stack applications, including JWT authentication, role-based access control (RBAC), secure REST API authorization, password hashing, input sanitization, CORS configuration, and route protection, reducing security vulnerabilities and ensuring secure access to application resources. Technologies: Node.js, Express.js, JWT, Angular, reactjs MongoDB, REST APIs
- Mentor junior developers, Collaborated with UX/UI designers and Utilized AI-assisted development tools to accelerate Responsive frontend and user interface development, code generation, debugging, refactoring, documentation, and testing for rapid POC development.

Tata Consultancy Services • Mumbai, Maharashtra
07/2021 - 04/2024

System Engineer

- Developed Full Stack features for an enterprise HRMS application, collaborating with a cross-functional team to build employee leave management and HR operations modules, delivering scalable frontend interfaces, backend services, and seamless business workflows. Technologies: React.js, Node.js, Express.js, REST APIs
- Optimized the performance of 20+ enterprise Full Stack applications by identifying and resolving frontend and backend bottlenecks, implementing lazy loading, code splitting, API response optimization, SQL query tuning, database indexing, and performance profiling, resulting in a 23% increase in user engagement, 50% reduction in bounce rate, reduced production error rates and overall user experience. Technologies: Angularjs, React.js, Node.js, FastAPI, Java, Springboot, JavaScript, TypeScript, HTML5, CSS3, MongoDB, PostgreSQL
- Developed and integrated RESTful APIs, conducted code reviews and third-party services for Full Stack applications, enabling real-time data synchronization, dynamic dashboard updates, and seamless system integration, reducing manual refresh efforts by 90% while improving application responsiveness and user experience. Technologies: Angularjs, React.js, Node.js, java, FastAPI, REST APIs, JavaScript, TypeScript

SKILLS

Frontend Development

- Angularjs(15–21)
- Bootstrap
- JavaScript(ES6+)
- PrimeNG
- Reactjs
- TailwindCSS
- TypeScript

Backend & APIs

- API Integration
- Express.js
- FastAPI
- Java
- Node.js
- RESTful API Development
- springboot
- SQL

Databases & Cloud

- AWS
- AzuredevOps
- CI/CD
- DB2
- Git
- Github
- MongoDB
- MYSQL
- Oracle
- PostgreSQL
- SQl

AI tools

- ChatGPT
- Claude
- Cursor
- Gemini
- Google Antigravity

Soft Skills

- Accountability
- Communication
- Trouble Shooting

- Optimized Oracle and DB2 databases by improving SQL queries, joins, indexing, stored procedures, database views, and backend scripts, enhancing query performance, automating business workflows, and improving data processing efficiency. Technologies: Oracle, DB2, SQL

Microsoft

Technical Consultant Trainee

- Built an AI-enabled Intelligent Bin during a project-based internship in Python for AI, leveraging Python and Raspberry Pi to monitor real-time waste levels and trigger automated alerts at 80% capacity, reducing manual monitoring and improving waste management efficiency.

EDUCATION

Bachelor of Engineering in Computer Engineering

Padmabhushan vasantdada patil pratisthans's college of engineering
01/2021

CERTIFICATIONS

IoT and Game Development

Microsoft
